	Installing Hog 4PC after Upgrading to Windows 8.1	Nov 8, 2013	PAGE 1/1

Installation of Hog 4PC on Windows 8.1 is supported in software versions 2.0.0 and greater but Hog 4PC may still fail to install on Windows 8.1 computers that were upgraded from a previous version of Windows if an older version of Hog 4PC is installed.

To solve this problem users must run an uninstall utility to remove the older version of Hog 4PC software before installing Hog 4PC v2.0.0 or greater.

Follow these steps to correct the issue:

1. Download the Windows Installer Clean Up Utility linked below:  
<http://www2.highend.com/support/controllers/software/msicuu2.exe>
2. Right click on the installer and select "Run As Administrator"
3. Follow the installation wizard and complete the installation
4. Run the Windows Installer Clean Up Utility
5. Select Hog4PC from the list of applications and click remove  
*(note: icons and program files of Hog 4PC will remain on your computer)*
6. You may now download and install Hog 4PC v2.0.0 or greater
